

## Commercial Nuc Plans – Ply: 9mm and 12mm (when don't have 18mm!) (Sized so two sit on a commercial brood)

### Bill of materials / cutting requirements:

Quantity	Length	Height	Thickness	Notes
2	441mm	267mm	12mm	• Butt jointed to frame hanging sides
2	232mm	267mm	12mm	• Butt jointed to sides with 9mm attached to face
2	208mm	244mm	9mm	• Attached to face of 12mm for frame hanging (assumes metal runners)

Glue and screw butt joints  
Tack and glue 9mm onto face of 12mm ply

### Frame holders

Fix 9mm ply inside 12mm end pieces as frame holders.

Sized for 17mm top gap assuming using metal runners  
(11mm if no runner, so then need 9mm 6mm taller)

Sized for mounting 6mm up from base
